EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Paragraph [0001] of the specification has been rewritten as follows:

--[0001] This application is a continuation of PCT Application No.

PCT/US03/22537, entitled "IMPEDANCE BASED APPARATUSES AND METHODS FOR ANALYZING CELLS AND PARTICLES", filed July 18, 2003, which is incorporated by reference herein, and claims benefit of priority to United States provisional application number 60/397,749, filed on July 20, 2002; United States provisional application number 60/435,400, filed on December 20, 2002; and United States provisional application 60/469,572, filed on May 9, 2003, each of which is incorporated by reference herein. This application also incorporates by reference PCT Application No. PCT/US03/22557, entitled "IMPEDANCE BASED DEVICES AND METHODS FOR USE IN ASSAYS", filed July 18, 2003.--

2. The following is an examiner's statement of reasons for allowance:

Claims 1, 6, 8-10, 24, 25, 28, 29, 43, 50, 62, 65, 68 and 69 are allowable because the reference of Sparks does not teach or fairly suggest providing the electrodes on the membrane such that the at least two electrodes are partially exposed through the pores of the porous membrane. As argued by Applicants (See pages 21-22 of the response filed

Art Unit: 1797

5/30/2008), the electrodes of Sparks are not exposed through the openings of the membrane but instead are positioned entirely on the solid portion of the substrate.

Claims 11 and 157-161 are allowable because the prior art of record fails to teach or fairly suggest introducing cells on the downstream side of the membrane relative to the electrode pairs in the device of Sparks for monitoring the migration or invasion of cells through the membrane. The reference of Sparks requires that cells are introduced on the upstream side of the membrane relative to the electrode pairs which is on the opposite side of the membrane when compared to instant claim 11.

Claims 51, 139-142 and 162-169 are allowable because the prior art of record fails to teach or fairly suggest combining the membrane device of the reference of Sparks with a structure that defines a plurality of isolated fluid containers wherein at least one of the containers comprise a single IDES or CCES.

Claims 143-156 are allowable because the prior art of record fails to teach or fairly suggest combining the membrane device of the reference of Sparks with a plate the comprises one or more wells wherein the membrane device separates the well into upper and lower chambers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 1797
